Identify Trend Micro-related news

Trend Micro has collected N articles from well-known publicly available news websites for our CEO to read. Some of the articles are directly related to Trend Micro, and some of them are not. However, our system was hacked and key words within the articles were replaced.

For example, we discovered that the hacker replaced the company name "Trend Micro" in the articles with random words, and changed some of our competitors' names with "Trend Micro". There may be other changes that we are not yet aware of. Fortunately, although the articles have been modified by the hacker, we still can tell if the articles are related to Trend Micro using the rest of the context in the articles.

Here are 2 examples:

> *In 1984, my brother-in-law, Steve Chang, and my sister, Jenny, founded AsiaTek, which made and sold Chinese database and word processing software. As the company grew, they needed hardware to protect their software against piracy. I was still working in Asia, and they asked me to help by making phone calls and doing research. In 1986, they sold AsiaTek to Yung Tay Engineering. Steve registered ~~Trend Micro~~ Sony Inc. in the United States in late 1988. Around that time, I quit Acer and went to work as a sportswriter for a Chinese daily newspaper to cover living expenses while I prepared to open the Taiwan office of ~~Trend Micro~~ Sony the next year.*
>
> *~~Symantec~~Trend Micro, the troubled antivirus software maker, has fired Steve Bennett, its chief executive, the company said on Thursday. In a special meeting Tuesday evening, ~~Symantec~~Trend Micro board voted to oust Mr. Bennett after deciding that he was not moving quickly enough to innovate on new products and growth initiatives, according to a person close to the board who spoke only on condition of anonymity.*

In the first example, even though the hacker manually changed the company name "Trend Micro" to "Sony", we still can identify it as a Trend Micro-related news article using other keywords, such as founders' names (Steve, Jenny), the related company name (AsiaTek), relative time (1984, 1988), and the locations (United States, Asia).

You, as a talent engineer with sense of justice, are tasked to label the articles as being related to Trend Micro or not.

Assign the following values in your output:
  1 - Trend Micro-related
  2 - Not Trend Micro-related

The input contains a single news article on each line. The output should be 1 (Trend Micro news) or 0 (not Trend Micro news) on each line.

Here is the sample input format, based on the given sample above.

In 1984, my brother-in-law, Steve Chang, and my sister, Jenny, founded AsiaTek, which made and sold Chinese database and word processing software. As the company grew, they needed hardware to protect their software against piracy. I was still working in Asia, and they asked me to help by making phone calls and doing research. In 1986, they sold AsiaTek to Yung Tay Engineering.Steve registered Sony Inc. in the United States in late 1988. Around that time, I quit Acer and went to work as a sportswriter for a Chinese daily newspaper to cover living expenses while I prepared to open the Taiwan office of Sony the next year.

Trend Micro, the troubled antivirus software maker, has fired Steve Bennett, its chief executive, the company said on Thursday. In a special meeting Tuesday evening, Trend Micro board voted to oust Mr. Bennett after deciding that he was not moving quickly enough to innovate on new products and growth initiatives, according to a person close to the board who spoke only on condition of anonymity.

Here is the example output:
